Bundestag

Congress

EU Parliament

Billions of \$,£,€,¥,ruble,etc
Invest money to weapon & war

Politicians

Politicians

Millions of \$,£,€,¥,ruble,etc

Millions of \$,£,€,¥,ruble, etc

Weapon Industry & Military

(Joint-stock Companies, AB, AO etc)

Candidate to politician
(honest or sold, difficult to know)

Lobbyists

оружие, крейсера, подводные лодки и авианосцы, танки, самолеты, ракеты и другое имеют одну единственную цель. Убедить нас, людей! После всего этого можем ли мы действительно назвать себя цивилизованными?

The big one electorate but too naive voters.

The little group of electorate

but very smart & circumspect voters oriented only about benefit

MARKET OF WEAPON INDUSTRY

Products & results of close cooperating of sold politicians & weapon industry
What and how much invests you in this market?

Market for somebody ...

Life & dead for another

CONSEQUENCES

ACTIONS

WHAT IS HAPPED AND WHAT WE CAN DO?

We simple citizens, are easy extraction and victims of an alliance of politicians, lobbyists and representatives military - industrial complexes, their uncountable, various production. Their market are military actions and gangsterism and citizens-children, women, old people are their defenseless victims. The ministries of defenses of many countries for a long time have turned to the ministries of an attack, and the ministry of national safety in the ministries of national danger.

We operate only when the trouble is knocked on our doors when we become victims of the armed violence, those bombing attacks who prefers to make profit due to violence. This category of people include not only gangsters from street but also armed forces of the countries and people who create weapon, write application of the weapon and plans of action: gangsters or army. Our reaction and our actions decrease proportionally to distance between us and a scene of action of violence:

- We REACT most strongly when the trouble concerns personally us and our relatives;
- We DON'T REACT when the trouble concerns the citizens living in the far countries and other continents;
- We WORRY about far continents only when our relatives are at war there on call of authorities.
- We DON'T WORRY, we do not reflect and we are not interested about what our soldiers do in those edges far;
- We UNDERSTAND that it is necessary to protect the Homeland, the house and the relatives;
- We DON'T UNDERSTAND, that other people from other countries too think as well as we, they too wish to protect the Homeland, the house and the relatives;
- We ARE INDIGNANT, when citizens of those far edges kill ours the soldier, protecting itself, the house, the country and attack us;
- We ARE NOT INDIGNANT, when our soldiers kill defenceless children, women and old men in those far countries;
- We REPRESENT, how it is heavy to operate the country, to create strong Army and the modern weapon for protection of the country;
- We DO NOT REPRESENT, How and for what are used this Army, these supermodern instruments of murder; we do not represent about authorities operation, they can deceive us, our children, calling them to be patriots, protect the Native land by Warning-attack and Preventive attack against "POTENTIAL ENEMIES " far in other continents for the sake of satisfaction of the political ambitions and an ambition of aggressive generals and admirals;
- We ARE SURPRISED to waves of economic crises, not thinking that billions dollars, the euro, pounds sterling, roubles, yuans, etc. are spent for war, on creation and accumulation of a different sort of the weapon of the highest class, ultrahigh accuracy, high destroying force, high efficiency on destruction of alive force, i.e. people - first of all children, women, old men and after the well protected soldiers of "enemies" invented of our politicians;
- We ARE NOT SURPRISED, that the national economy cannot sustain such budget when Weapon Industry, the Ministries of Attacks and the Ministries of National UnSecurity, devour all means which could be used for peace development of the country, that these power structures always require existence of "the enemy" and front of actions which can be created artificial if they are not exist actually.

However now we have to say: STOP! We cannot accept all this! We should stop this VICIOUS CIRCLE of the HARM which already for a long time turns by inertia plus owing to efforts small groups of businessmen - lobbyists, representatives of Weapon Industry, military leaders, aggressive politicians - founders of the Weapon, Conflicts and wars.
